SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

SYMANTEC CORPORATION

Dated: May 29, 2018

By: /s/ Nicholas R. Noviello
Name: Nicholas R. Noviello
Title: Executive Vice President and Chief Financial Officer

Exhibit 1.01 to Form SD

**SYMANTEC CORPORATION
CONFLICT MINERALS REPORT
FOR THE REPORTING PERIOD JANUARY 1 TO DECEMBER 31, 2017**

This Conflict Minerals Report has been prepared by Symantec Corporation (herein referred to, alternatively, as “Symantec,” “we” and “our”). This Conflict Minerals Report for the reporting period January 1 to December 31, 2017 is presented to comply with the final Conflict Minerals implementing rules (the “Conflict Minerals Rules”) promulgated by the Securities and Exchange Commission (“SEC”), as modified by SEC guidance issued on April 29, 2014 and the SEC order issued on May 2, 2014. The Conflict Minerals Rules were adopted by the SEC to implement reporting and disclosure requirements related to Conflict Minerals as directed by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 as codified in Section 13(p) of the Securities Exchange Act of 1934. The Conflict Minerals Rules impose certain reporting obligations on SEC registrants whose manufactured products contain Conflict Minerals that are necessary to the functionality or production of their products. “Conflict Minerals” are currently defined by the SEC as cassiterite, columbite-tantalite (coltan), gold, wolframite, or their derivatives, which the SEC has currently limited to tin, tantalum, tungsten and gold.

To comply with the Conflict Minerals Rules, we conducted due diligence on the origin, source and chain of custody of the Conflict Minerals that were necessary to the functionality or production of the products that we manufactured or contracted to manufacture to ascertain whether these Conflict Minerals originated in the Democratic Republic of Congo or an adjoining country (collectively, the “Covered Countries”) and financed or benefited armed groups (as defined in Section 1, Item 1.01(d)(2) of Form SD) in any of these countries.

Pursuant to SEC guidance issued April 29, 2014 and the SEC order issued May 2, 2014, Symantec is not required to describe any of its products as “DRC conflict free” (as defined in Section 1, Item 1.01(d)(4) of Form SD), “DRC conflict undeterminable” (as defined in Section 1, Item 1.01(d)(5) of Form SD) or “having not been found to be ‘DRC conflict free,’” and therefore makes no conclusion in this regard in the report presented herein. Furthermore, given that Symantec has not voluntarily elected to describe any of its products as “DRC conflict free,” an independent private sector audit of the report presented herein has not been conducted.

I. Company Overview

Founded in 1982, Symantec has evolved to become a global leader in cyber security, with more than 11,000 employees in more than 45 countries. Symantec provides cyber security products, services, and solutions to more than 350,000 organizations and 50 million individuals worldwide.

Other than the information expressly set forth in this report, the information contained or referred to on our website is not part of this report.

II. Products Overview

Symantec’s Integrated Cyber Defense Platform helps enterprise, business, and government customers unify cloud and on-premises security to protect against threats and safeguard information across every control point and attack vector. Symantec’s Digital Safety solutions (delivered via Norton and LifeLock brands) help consumers protect their information, identity, devices, and networks at home and online.

Symantec product overviews can be found at <http://www.symantec.com/products-solutions/>.

All tier one suppliers of physical products that Symantec contracts to manufacture are considered suppliers. These suppliers manufacture products in the following categories: (i) software, (ii) appliances and (iii) tokens.

III. Supply Chain Overview

All of Symantec’s product manufacturing is outsourced to Subcontract Manufacturing and Logistic Partners. Our suppliers are located in North America, South America, EMEA, Russia and Asia. In 2017, Symantec sourced from 24 suppliers, 13 of which did not manufacture products that contain Conflict Minerals.

IV. Conflict Minerals Analysis and Reasonable Country of Origin Inquiry

Based upon a review of our product categories and our reasonable country of origin inquiry (“RCOI”), we have concluded that:

- Our appliance and token products contain Conflict Minerals that are necessary to the production or functionality of such products; and
- We are unable to determine whether the Conflict Minerals present in such products originate in the Covered Countries.

We are therefore required by the Conflict Minerals Rules to file with the SEC a Form SD and a Conflict Minerals Report as an exhibit thereto.

V. Design of Due Diligence Measures

Symantec designed its due diligence with respect to the source and chain of custody of the Conflict Minerals contained in its products based on the five-step framework set forth in the Third Edition of the Organisation for Economic Co-operation and Development’s Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict- affected and High-Risk Areas and the supplements thereto.

VI. Due Diligence Measures Performed by Symantec

Step #1: Establish Strong Company Management Systems

- Symantec maintains a policy on Conflict Minerals (the “Policy”). The Policy can be viewed at <https://www.symantec.com/content/dam/symantec/docs/other-resources/sym-conflict-minerals-policy-en.pdf>. The Policy has been communicated to relevant personnel, and it is available to all Symantec employees via Symantec’s website.

- Symantec’s Conflict Minerals Team (the “Team”) is responsible for Conflict Minerals due diligence, governance and reporting. The Team consists of representatives from Global Supply Chain Management, Finance, Legal and Corporate Responsibility, all of whom have experience and expertise with respect to the requirements of the Conflict Minerals Rules, and is supported by external consultants. Oversight of Symantec’s Conflict Minerals due diligence, governance and reporting is exercised by the Company’s Disclosure Committee and the Nominating and Governance Committee of the Board of Directors. The Team is supported by a member of Symantec’s Senior Management Team.
- To make training regarding Conflict Minerals compliance available to suppliers, Symantec refers suppliers to the Responsible Minerals Initiative’s (“RMI”) website at www.responsiblemineralsinitiative.org/training-and-resources, which contains Conflict Minerals training materials and resources for suppliers.
- Symantec’s Policy has been made available to existing suppliers, and Symantec makes the Policy available to new suppliers as part of the new supplier onboarding process. In addition, Symantec will incorporate a provision requiring compliance with the Conflict Minerals Rules and the Policy into (i) new supplier agreements and (ii) existing supplier agreements when such agreements are negotiated for renewal.
- Pursuant to the Policy, concerned parties may contact Symantec regarding complaints related to Conflict Minerals compliance by contacting Symantec’s Ethics Line online at SymantecEthicsLine.EthicsPoint.com, via telephone by choosing a number from <https://secure.ethicspoint.com/domain/media/en/gui/28771/phone.html> or by sending an e-mail to the Office of Ethics and Compliance at ethicsandcompliance@symantec.com. Suppliers may also contact their supply chain representative in their region.
- All documentation and records, including all material communications with suppliers, are retained electronically for a period of five (5) years.

Step #2: Identify and Assess Risk in the Supply Chain

- Symantec maintains a Conflict Minerals Compliance Program (the “Program”) that outlines the process for supplier due diligence and engagement.
- The Program includes the identification of the suppliers that provide inputs to Symantec’s products that may contain Conflict Minerals. This analysis is performed on an annual basis, as well as through the ongoing supplier approval and onboarding process, with data pulled from the global supplier database.
- The Corporate Responsibility Team works with Global Supply Chain Management, Legal and Finance to determine the enterprise reporting entity for compliance purposes. This includes the determination of whether any of Symantec’s subsidiaries, joint ventures, or acquired companies are in-scope or out-of-scope for the respective reporting year pursuant to the Conflict Minerals Rules.

- For out-of-scope entities, if the entity supplies Symantec in-scope entities with products Symantec contracts to manufacture, then the entity is considered a supplier and is surveyed as part of the RCOI process.
- The RMI’s Conflict Minerals Reporting Template (the “Survey”) is emailed annually by the Global Supply Chain Team to all in-scope suppliers along with an introductory email.
- On an annual basis, any new subsidiaries and joint ventures are evaluated for inclusion as an in-scope entity for the purposes of compliance with the Conflict Minerals Rules.
- For acquisitions, due diligence is conducted to determine whether the newly acquired organization is subject to the Conflict Minerals Rules.

Step #3: Design and Implement a Strategy to Respond to Identified Risks

- Symantec has designed a Due Diligence Decision Tree that sets forth steps to be taken to mitigate risk based on a supplier’s Survey responses. Suppliers are ranked for risk, ranging from Low to High, based upon red flags and issues raised by suppliers’ Survey responses (the “Risk Levels”).
- All suppliers regardless of Risk Level in 2017 were contacted via email with follow-up questions, comments and/or requests.

Step #4: Carry Out Independent Third-Party Audit of Supply Chain Due Diligence at Identified Points in the Supply Chain

- As a downstream actor in the supply chain, we do not have a direct relationship with the smelters and refiners that process the Conflict Minerals that are present in our products, and for this reason we rely on the RMI to conduct third-party audits of smelters and refiners.

Step #5: Report on Supply Chain Due Diligence

- As required by the Conflict Minerals Rules, we have filed a Form SD and a Conflict Minerals Report as an exhibit thereto for the 2017 reporting year. The Form SD and Conflict Minerals Report are also available on our website at <https://www.symantec.com/about/corporate-responsibility/the-world/supply-chain-responsibility>.

VII. Supplier Survey Responses and Smelter and Refiner Information

The supplier Survey results were as follows:

- 91% of in-scope suppliers responded using the Survey.
- 100% of suppliers who responded provide products that contain Conflict Minerals.
- 80% of suppliers who responded source from the Covered Countries.

- 90% of in-scope suppliers who responded have a Conflict Minerals policy in place, and 70% of such in-scope suppliers have made their policy available to the public.
- 90% of in-scope suppliers who responded require their direct suppliers to be DRC conflict-free (as defined in the Survey) and require direct suppliers to source the 3TG from smelters whose due diligence practices have been validated by an independent third-party audit program.
- 90% of in-scope suppliers who responded have implemented due diligence measures for conflict-free sourcing.
- 100% of in-scope suppliers who responded collect conflict minerals due diligence information from their suppliers that is in conformance with the IPC-1755 Conflict Minerals Data Exchange Standard (e.g., the RMI Conflict Minerals Reporting Template).
- 60% of in-scope suppliers who responded only require their direct suppliers to source the 3TG from smelters whose due diligence practices have been validated by an independent third party audit program.
- 90% of in-scope suppliers who responded review due diligence information received from their suppliers against their company's expectations.
- 80% of in-scope suppliers who responded have a review process in place that includes corrective action management.
- 10% of in-scope suppliers who responded are subject to the Conflict Minerals Rules.

In addition, Addendum A to this Conflict Minerals Report contains a list of those smelters reported by our suppliers that appear on the RMI's Standard Smelter List.

VIII. Steps to Mitigate Risk

Symantec intends to take the following steps to mitigate the risk that its necessary Conflict Minerals benefit armed groups:

- Follow up with non-responsive suppliers;
- Continue to engage with suppliers to obtain complete Surveys;
- Support the development of supplier capabilities to perform Conflict Minerals-related due diligence by means of the implementation of risk mitigation measures, as appropriate; and
- provide ongoing training regarding emerging best practices and other relevant topics to personnel responsible for Conflict Minerals compliance.

FORWARD LOOKING STATEMENTS

Statements relating to due diligence improvements and certain other statements herein are forward-looking in nature and are based on Symantec's management's current expectations or beliefs. These forward-looking statements are not a guarantee of performance and are subject to a number of uncertainties and other factors that may be outside of Symantec's control and that could cause actual events to differ materially from those expressed or implied by the statements made herein.

DOCUMENTS INCORPORATED BY REFERENCE

Unless otherwise stated herein, any documents, third-party materials or references to websites (including Symantec's) are not incorporated by reference in, or considered to be a part of, this Conflict Minerals Report, unless expressly incorporated by reference herein.

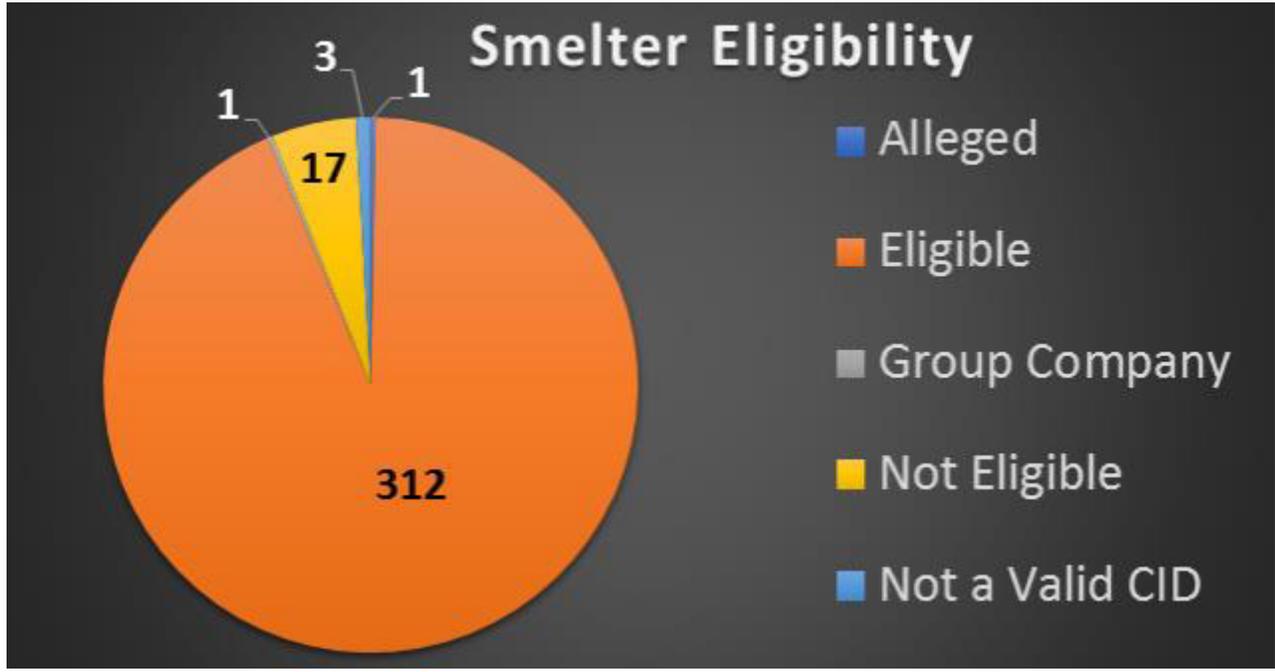

Addendum A

With the exception of one supplier, the smelter information below was reported by Symantec suppliers using the Conflict Minerals Reporting Template, Revision 5.10.

Data collection was completed between February 2018 and April 2018.

For more detail and the most current status of each smelter, please visit the Responsible Minerals Assurance Process (“RMAP”) website at www.responsiblemineralsinitiative.org.

<u>Eligibility</u>	<u>Explanation</u>
Alleged	Unknown if entity is a smelter or refiner; more research is needed; not included in the RMI Standard Smelter List
Eligible	Meets the definition of a smelter or refiner; included in the RMI Standard Smelter List
Group Company	Does not meet the definition of a smelter or refiner but entities that are part of the company group may meet such definition
Not Eligible	Does not meet the definition of a smelter or refiner or is otherwise ineligible for the RMAP; not included in the RMI Standard Smelter List
Not Valid CID	Smelter number not valid

200FS12ZLVgzNs6g

Smelter Status

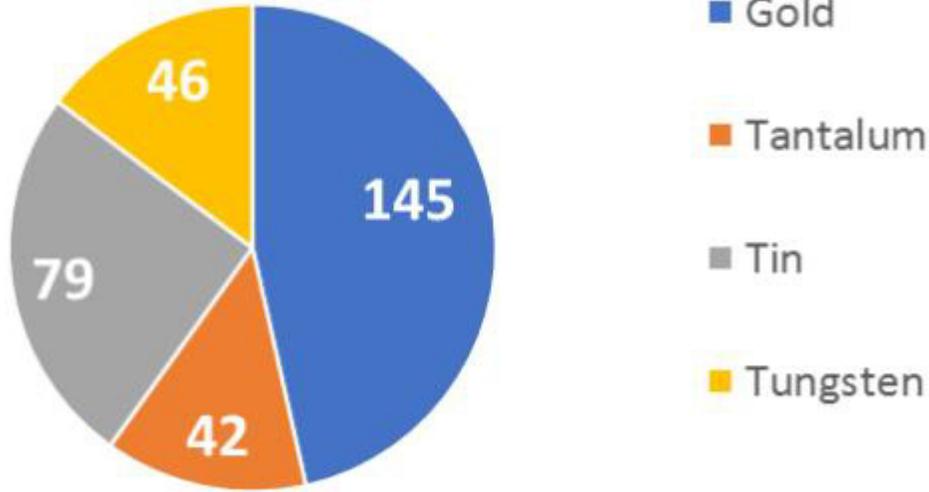

Active	Engaged in the RMAP but not yet conformant
Conformant	Audited and found conformant with the relevant RMAP protocol
In Communication	Not yet active but in communication with the RMAP and/or a RMI member company
Not Applicable	Not eligible for the RMAP
Outreach required	Outreach needed by RMI member companies to contact entity and encourage its participation in a RMAP audit
Communication Suspended—Not Interested	Facility has strongly communicated a lack of interest in participation in the RMAP
Due Diligence Vetting Process	Facility does not meet the RMI’s requirements for participation according to the due diligence vetting process
Non-Conformant	Audited but found not conformant with the relevant RMAP protocol
Not Valid CID	Smelter number not valid

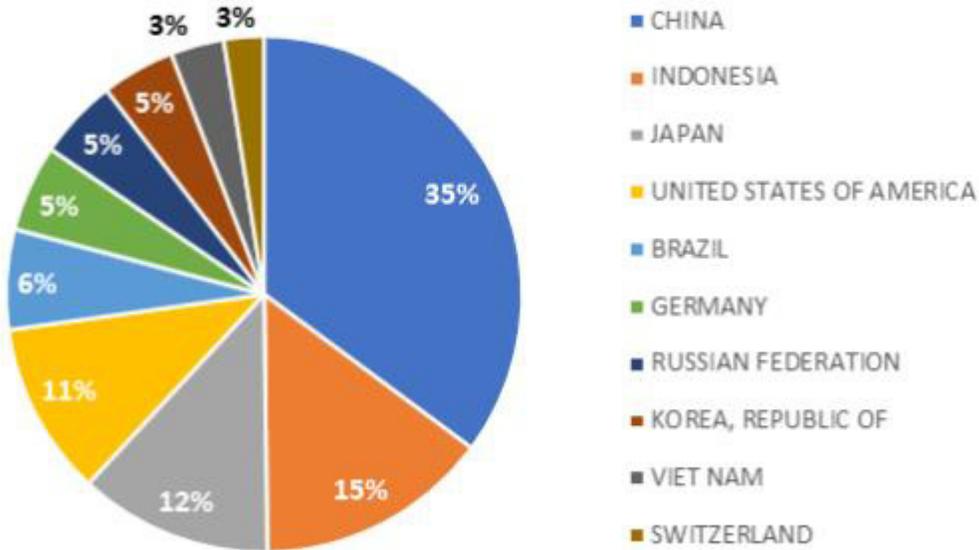

200FS12ZLVgzL=hg
